

UNITED STATES DEPARTMENT OF AGRICULTURE

DIRECTOR OF EXTENSION WORK

WASHINGTON, D. C.

119
E4892 Cre

Circular Letter
REA, No. 5-40

July 29, 1940.

TO ALL STATE EXTENSION DIRECTORS:

The Rural Electrification Administration wishes to make a survey of rural electrification research and teaching by agricultural and engineering schools. Field engineers of their staff will be available for this purpose in the interim between 1941 loans now being made and actual construction of lines financed with these loans.

We have suggested that they interview you for information on extension rural electrification activities. Therefore, the field engineer in your area will likely call on you sometime during the next thirty days.

We will appreciate any information you can give this representative, as we agree with REA that the information to be secured will be of value both to Extension and to REA.

You may also wish to refer him to other members of your staff who are especially familiar with rural electrification activities.

Very truly yours,

M. L. Wilson

Director of Extension Work.

October 1918
No. 1-18

1918-1919

THE 1918-1919 SEASON

The 1918-1919 season has been a very successful one for the Department of Agriculture. The work of the Department has been carried on in a most efficient manner, and the results have been most satisfactory. The Department has been able to secure a large amount of information regarding the various crops and animals raised in the United States, and this information has been used to the best advantage in the preparation of the various reports and publications of the Department.

It has also been a very busy season for the Department, and the work has been carried on in a most efficient manner. The Department has been able to secure a large amount of information regarding the various crops and animals raised in the United States, and this information has been used to the best advantage in the preparation of the various reports and publications of the Department.

The Department has also been able to secure a large amount of information regarding the various crops and animals raised in the United States, and this information has been used to the best advantage in the preparation of the various reports and publications of the Department.

The Department has also been able to secure a large amount of information regarding the various crops and animals raised in the United States, and this information has been used to the best advantage in the preparation of the various reports and publications of the Department.

Very truly yours,

W. R. Wilbur
Secretary of Agriculture
